

ABSTRACT

Docket No.: NHL-DOR-105
Serial No.: 10/036,847

**A BUILDING GLASS FACADE, A METHOD FOR MOUNTING GLASS
PANES IN A BUILDING GLASS FACADE, AND A CLAMPING
ARRANGEMENT FOR MOUNTING GLASS PANES IN A BUILDING
GLASS FACADE**

ABSTRACT OF THE DISCLOSURE

A building glass facade having glass panes that are mounted to a mounting structure, such as a building. The glass panes are mounted using clamp fittings or clamping arrangements for fastening glass panes with two clamping elements that clamp the glass pane between them, whereby one clamping element is realized in the form of a conical nut or taper nut that is set into a boring of the glass pane and has a detachable cover. The invention teaches that a clip closure is integrated into the cover or is an integral part of the cover.
